EDUCATION

Drexel University

Bachelor of Science in Computer Science

Bachelor of Science in Mechanical Engineering

Philadelphia, PA

September 2019 – June 2024

Coauthored a published article: <https://www.sciencedirect.com/science/article/abs/pii/S1751616122002405>

EXPERIENCE

Stel Life, Inc.

Platform Engineer

July 2025 – Present

Philadelphia, PA

- Architected and deployed invoice automation service, reducing manual billing time by 20 hours/week and human error by 100%; integrated AWS SQS, Lambda, QuickBooks API, and Terraform-managed infrastructure
- Transformed static alert system into dynamic and configurable, serving 50+ organizations, eliminating hundreds of lines of hardcoded alert logic through Django Admin, and reducing alert deployment time by 90%
- Implemented AWS resource governance framework, enforcing tagging compliance across 300+ AWS resources and achieving 99% tag validation rate through SCP and CI/CD validation rules
- Owned end-to-end device ordering feature that drove \$15K in quarterly device revenue; designed and implemented Django and React solution that reduced ordering friction and made the workflow completely self-sustained

Drexel University

Software Engineer

September 2024 – July 2025

Philadelphia, PA

- Processed and managed millions of lines of unstructured recorded data that was gathered by an autonomous vehicle system's LiDAR, RADAR, cameras and GPS sensors
- Built advanced statistical models and created an automated reporting pipeline with Python and R
- Forged a data visualization platform utilizing React, Redux, Express.js, and MongoDB; presented actionable insights to stakeholders by creating 10+ interactive dashboards
- Trained and optimized YOLOv7 model for real-time object detection and classification; improved accuracy by 20%

Macquarie Asset Management

Software Engineer Intern

September 2023 – April 2024

Philadelphia, PA

- Engineered and deployed team's homepage using JavaScript, HTML and CSS, presenting it to 150+ employees
- Developed a Python-based password rotation system integrated with AWS CloudFormation for load balancer configuration, implementing thorough testing with pytest
- Orchestrated security vulnerability detection by creating Bash scripts to execute Fortify and BlackDuck scans, delivering code in isolated Docker containers and improving compliance scores by 25%
- Migrated a Python ETL application from Pandas to Polars, achieving a 500% increase in processing speed

Meusic

Software Engineer Intern

December 2022 – July 2023

Philadelphia, PA

- Developed secure user authentication module leveraging OAuth 2.0 and JWT, processing 200+ login requests per minute while enhancing data security and reducing unauthorized access incidents by 15%
- Implemented a scalable WebSocket infrastructure using Django Channels and Redis for the real-time chat feature, handling 500+ concurrent users with minimal latency and zero downtime incidents
- Optimized MySQL database queries through indexing and query restructuring, reducing server resource consumption by 40%
- Configured DigitalOcean CentOS Linux server environment and automated deployment processes with Docker

SKILLS

Languages: Python, Java, C, C++, Scala, Swift, SQL, JavaScript, TypeScript, HTML, CSS, Bash, MATLAB, R

Tools: TensorFlow, PyTorch, Spring Boot, Django, React, Git, LaTeX, Docker, MySQL, PostgreSQL, MongoDB
